

Happy family moments

Easter dresses by Knot

Lisbon, 30th march 2011 – Easter is arriving, sweet as always, and with it, the family reunions. Now with sunlit spring, the children's games are mainly the hunt for chocolate eggs and with that the joyful sounds that echo through the garden.

Experiences are also marked by a special wardrobe, carefully chosen by the mothers by looking for the most festive Spring / Summer dress. Knot dresses combine traditional details such as pleats or embroidery smok with fabrics with bold colors, soft or small flowers printed, like the trends dictates this season. For boys, Knot presents a more casual chic proposals, such as shirts with mandarin collar or shorts.

About Knot. just for kids?

A unique brand founded in 2007, Knot was born from a desire to keep children simple and beautiful, just as they are; always bearing in mind what's most important, which is to give them time to grow.

Since children like to imitate adults and adults would benefit from being more like children themselves, Knot is a brand for kids but not just for kids. In awe of a child's capacity to be curious, to learn, to capture the magic and excitement of every moment and to trust...our motto is be more like a child...

Our collections are conceived, designed and mostly produced in Portugal. We make clothes for boys and girls from 0-8, as well as some pieces for their discerning parents so that all the family can share in the Knot style, spending happy and special moments together.

Our clothes are made from quality fabrics, in an unfussy yet sophisticated style with simple cuts and those small but so important details which make all the difference. Our colours are gentle and subtle combined with splashes of brighter colours, exquisitely blending in with the total collection.
